MEDIA KIOSK

MediaKiosk – automatic content store

MediaKiosk system works in combination of three products: the online store (MediaKiosk Online Store), the MediaKiosk self-service kiosks with HydraKiosk software and the main processing system (Minotaurus).

MediaKiosk terminals come in three configurations: Premium, Smart and Mini (specification of the Mini model upon request).

MediaKiosk Kiosk Smart - basic features

One MediaKiosk terminal can carry more than 10 000 different multimedia products in one place. Also, if a multimedia product is not available in the terminal, all needed files will be downloaded to the kiosk on demand.
Any age-limited product is available to purchase only if the age verification procedure is passed. The verification can be passed by inserting a customer's EC card in a kiosk's card reader.

Digital products can be transferred to all popular formats of multimedia cards with a very fast USB 3.0 card reader.
The whole catalog of digital products presented in the terminal can be browsed remotely on customer's mobile devices over Wi-Fi network around the kiosk.
The MediaKiosk terminal accepts cash, coins and credit cards for purchasing digital products.

Configuration

  Average 300W
  Maximum 450W
- Dimensions 1120 x 424 x 368 mm (H x W x D)
- Weight 125 kg

MEDIA◎KIOSK

MediaKiosk Kiosk Premium - special features

The Premium kiosk model holds all features and functions of the Smart model, but it extends more functions multiplied to three with three screens in one kiosk.

The Premium model is capable to sell all types of digital content on CD/DVD/Blu-Ray discs or via USB 3.0 and high-speed wireless transfer. It occupies only one square meter and allows to purchase simultaneously digital content for up to three customers near kiosk and even more customers connected via Wi-Fi to the kiosk's network.

When a customer buys a disc, he doesn't need to wait for the disc near kiosk - he can pick it up anytime after the disc burning process is complete.

All purchased CD/DVD/Blu-Ray discs come with an environment-safety envelope to put the disc in and each disc can be printed on a special printer for discs in the Premium kiosk.

To engage customer's attention to the Premium kiosk three large advertising screens are mounted on the top of the kiosk.

  Average 500W
  Maximum 700W
- ◎ Dimensions 2200 x 950 x 950 mm (H x W x D)
- ◎ Weight 250 kg

MEDIA KIOSK

HydraKiosk® – software for self-service kiosks

Software features

- Interactive user interface specially designed to make a perfect presentation of any digital product on the kiosk.
- Full product information is given for each product: description, system requirements if needed, previews and videos.
- Powerful and helpful search engine.
- Multilingual interface.

Protection and Rent details

- All digital products are stored in the system in the encrypted form. Nobody has access to files stored in kiosk.
- If a multimedia product is protected with a serial number, then the software requests the serial number from a remote server only when the payment is done. After that a customer gets the serial number printed on a receipt.
- Starforce copy protection technology allows to protect all kinds of content like video files, audio files, software and games.
- It is possible to rent video products for limited time or for limited view times. The rent function is supported only for customers with multimedia devices driven by Windows.
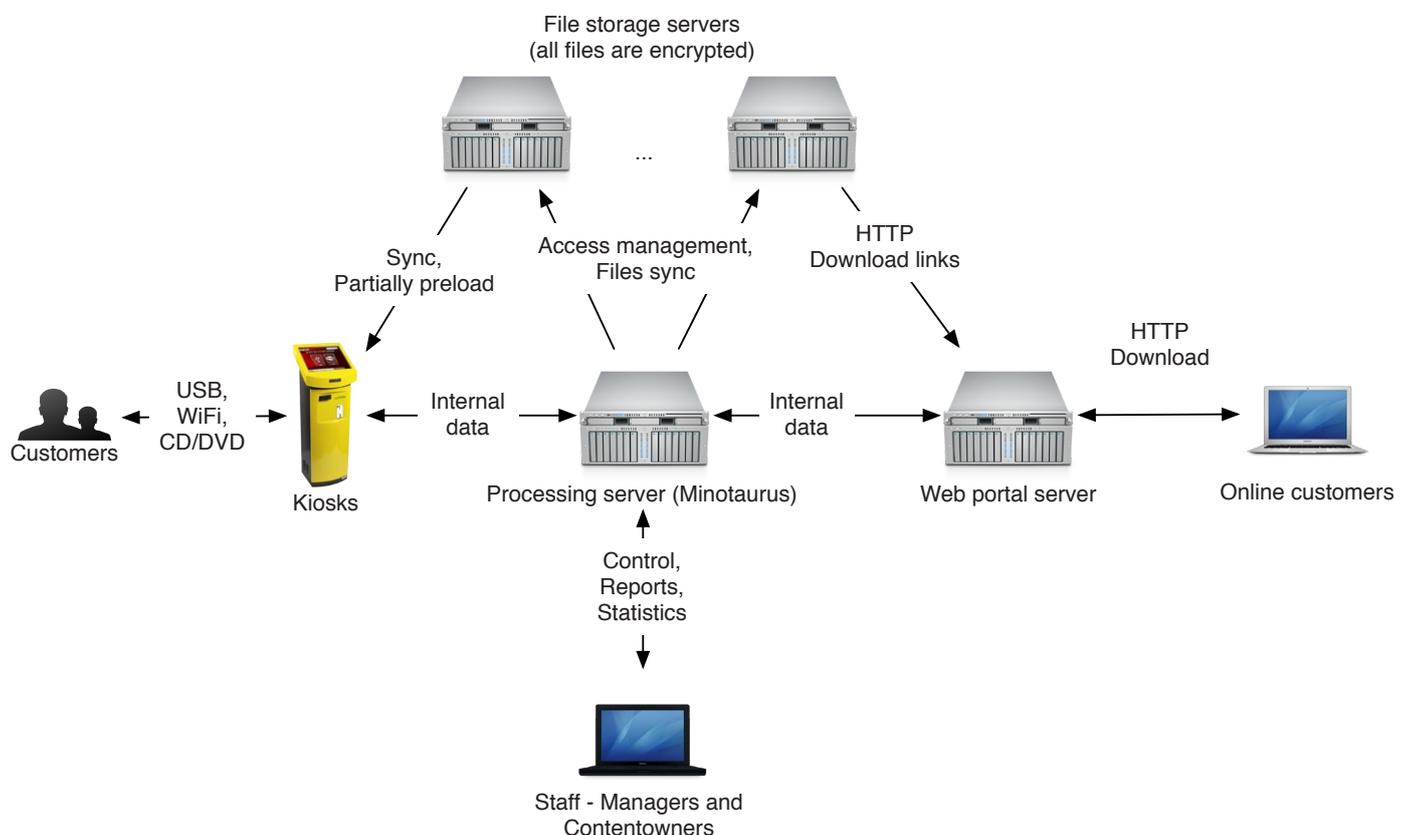

MEDIA◉KIOSK

Minotaurus® – processing software

Features

- ◉ Control all kiosks anytime and anywhere.
- ◉ All information about every device in each kiosk is available online.
- ◉ All details about sales also available online.
- ◉ Create prices profiles for content to apply on different kiosks or group of kiosks.
- ◉ Review sales statistics and generate reports.
- ◉ Upload advertising videos individually for each kiosks.
- ◉ Trace any malfunctions in kiosk's hardware to save time and money on diagnostic and maintenance services.
